

HIGHLIGHTS & ACCOMPLISHMENTS

- Worked to reduce bird aircraft strike hazards by encouraging the use of mobile radars, satellite tracking, and other technologies
- Incorporated PIF Bird Conservation Plan management strategies into installation Integrated Natural Resources Management Plans
- Conducted studies to determine the effects of various land management activities and military impacts on birds and their habitats
- Integrated management of all birds and all habitats into planning activities
- Restored and enhanced habitat for the benefit of migratory and resident birds
- Distributed PIF publications, especially *Bird Conservation* magazine, to DoD natural resources managers
- Provided access to DoD lands to researchers (federal and state agencies, NGOs, academia) as study areas
- Developed outreach materials (display, brochure, etc.), gave presentations, and provided representation at various state, regional, national, and international conferences
- Created DoD bird projects database and supported PIF species assessment database
- Published articles in non-DoD magazines and newsletters highlighting DoD bird conservation activities
- Established a network of biologists and natural resources managers to facilitate communication of DoD PIF goals and objectives
